

Paradox T Safety Shoe

Art nr: 1001197

T, a new shoe in the Paradox series, is a comfortable and soft safety shoe from Monitor. This series has a midsole in an extremely soft ETPU material with a Return/Rebound of over 58%, one of the absolute best cushioned safety shoes on the market. The outsole is made of non-slip rubber, which also has one of the best SRC ratings on the market! The upper is in Hypertex, which is an extremely durable textile material made of polyester and polyurethane. A new, stronger toecap in rubber has been added to further extend the service life of the product. The shoe lining is made of a moisture-absorbing fabric, and the new Monitor Pro-Support Recycle insole is made of PU with extra cushioning zones under the heel and forefoot. The nail protection is Monitor's Pantzar APT protection, which is extremely lightweight and flexible, and the toecap is wide and made of aluminium. The Paradox T model has a conventional lacing.
